maintenance and insurance.

Unrestricted boot access and excellent rear visibility with hood up or down.

Options include coach painting in customers choice of colour; sports wheels and tyres and full hood lining.

Abingdon presents: the Metroport

Until now, if you wanted to drive a car that stood out from the crowd, chances are you never went far without one eye on the road and the other on the fuel gauge. But thanks to the imagination of the **Rapport** design team an alternative is now available – the Metroport. A unique combination of economy and individual styling; a genuinely exciting car at a surprisingly sensible price.

We have replaced the Metro roof with a soft top – made from top quality cloth and combined with a roll bar for extra safety and rigidity – that drops easily, to provide all the fun of open top motoring. Elsewhere we have left the best of the Metro untouched – front wheel drive; low road and wind noise; good all round weather protection; and of course you can still choose any of those little luxuries like air conditioning and electric windows. We also make available a few extras of our own, like hand finished coachwork in your choice of colour, sports wheels and tyres and a full hood lining for increased comfort and insulation. And remember no Metroport leaves us without its unique badging – a finishing touch that sets the seal on a genuinely exclusive car.

There is that well known Metro economy too – whilst we may have added a lot to the car, rest assured we have hardly added a penny to the cost of keeping it on the road. And if you already own a Metro and would like us to transform it for you, call us now. Drive a Metroport **Rapport**.

In accordance with our policy of continuous improvement we reserve the right to amend specifications at any time.
